WEB DEVELOPMENT PROJECTS

MyFlix | CareerFoundry Project Jan 2024 - Mar 2024

- Built a Node.js application for managing a movie collection with Express.js and MongoDB, including user authentication and CRUD operations.
- Tested endpoints with Postman, documented the API, and deployed it on Heroku.
- Developed the front end for the Letflix streaming app in React with JS and Angular with Typescript, managed build processes with Parcel, and hosted on Netlify. <https://letflixnow.netlify.app/>
- Case Study for the project: <https://pablolaradev.com/casestudy.html>

Meet App | CareerFoundry Project Apr 2024 - Mai 2024

- Developed the front end for the Letflix streaming app in React, managed build processes with Parcel, and hosted on Netlify.
- Created a REST API with Node.js, Express, and Mongoose. Tested endpoints with Postman, documented the API, and deployed it on Heroku.
- Developed and tested app functions using Jest, Gherkin, and Puppeteer. Achieved 100% test coverage, ensuring a bug-free web app that allows users to filter events by city and use the app offline. <https://pablocubo.github.io/meet/>

Chat App | CareerFoundry Project Apr 2023 - Mai 2024

- Enhanced a React Native chat app with Cloud Firestore for real-time messaging and secure storage.
- Added features: image sharing, location sending, offline access, and improved accessibility for iOS and Android.
- Utilized React Native, Firebase, and JavaScript. <https://github.com/pablocubo/ChatApp>
